

To Whom It May Concern,

I am a student in this semester's ENGR 240, taught by Michael Lukas. As part of our term project, we are researching the feasibility of expanding soft plastics recycling on campus.

As your field of work/expertise is related to our project, I was hoping you might have some time to answer a couple of questions about a partnership between University of Victoria and Recycle BC.

Would UVIC be able to transport recyclable soft plastics to Recycle BC? If so, what would the potential cost be? If it possible to let me know a \$/kg that would be great.

Does Recycle BC offer commercial solutions of this nature? If not is there a business that you can recommend?

I very much appreciate any time you can have available. If you have any questions regarding this project, please contact the course instructor, Michael Lukas at mlukas@uvic.ca

Thank you very much for your time,
